06145 P6- HYDRAULIC SWING ARM CUTTING MACHINE

PERFECT WORLD OF INDUSTRY

The machine is used for cutting out parts of various shapes from leathers,synthetic materials,rubber,paper etc. by cutting die.
The oil way system is specially designed for convenient adjustment of the cutting head height. No other adjustment is needed after the height of cutting die is changed.
The swinging motion of the arm is manually controlled and the machine is operated by hands only.

TECHNICAL PARAMETERS

Cutting power	kN	220
Cutting arm stroke	mm	90
Width of cutting arm	mm	370
Working table dimensions	mm	900x430
Motor output	KW	1,1
Machine dimensions : width	mm	1050
depth	mm	1000
height	mm	1500
Machine weight (without oil)	kgs	690
