

The machine is used in the shoe-making industry for skiving the edges of shoe uppers, made of leather, synthetic materials, textiles, or felt and similar materials. In other industrial branches, it can be used for skiving similar materials.

TECHNICAL PARAMETERS

Productivity	pairs/h	24-77
Knife speed	rpm	3000
Skiving width	mm	1-50
Instaled output	kW	0,75
Machine dimensions :	width	mm
	depth	mm
	height	mm
Machine weight	kgs	65
